LAB ASSIGNMENT 3
Thursday, February 23
----

1. Write a restful service for doing CRUD operation on the given data model
{
    messageId:101,
    author:'James',
    message:'Its beautiful day outside, how is your day',
    date: '23-FEB-2017'
}

The application should have below services
*) Save a message
*) Update a message with id
*) Delete a message with id
*) Delete message with author
*) Get all messages
*) Get message based on id
*) Get Message based on the author, if there are more than one message with the same author it should show

And test the same with rest assured.
